

Claims

I claim:

1. A multi-configurable holster system comprising:

a holster for accommodating a piece of law enforcement equipment, said holster including a front wall having overlapping edges and attached to a center wall and a back wall, and at least two rail straps; and,

a rail system that includes at least two adjustable straps, one strap being positioned above the other one and each strap passing through at least one rail strap for holding said holster in a desired position.

2. The adjustable holster system of claim 1 further comprising:

a quick thumb release having a first and second end and for holding a piece of law enforcement equipment in place.

3. The adjustable holster system of claim 1 further comprising:

a front wall comprising orthopedic elastic; and,

a back wall comprising cordura laminated to orthopedic padding.

4. The adjustable holster system of claim 1 further comprising:

nylon binding material attached to the front wall and the rail straps for providing re-enforcement of the rail straps;

5. The adjustable holster system of claim 1 further comprising:
 - a thumb release comprising hook and loop material for holding a piece of law enforcement equipment in place.
6. The adjustable holster system of claim 1 further comprising:
 - an edge of the front wall comprising binding.
7. The adjustable holster system of claim 1 wherein at least said rear wall comprises cordura material.
8. The adjustable holster system of claim 1 further comprising:
 - buckles affixed to said rails for adjusting said rails to a desired length.
9. The adjustable holster system of claim 1 further comprising:
 - rails comprising elastic webbing.
10. The adjustable holster system of claim 1 further comprising:
 - a zipper having two ends, each end affixed to a rail.
11. The adjustable holster system of claim 10 further comprising:
 - a redundant buckling system attached to said zipper and for preventing said zipper from unzipping during use.

12. The adjustable holster system of claim 1 further comprising:

impact buckles attached at ends of the rails.

13. A holster for accommodating a piece of law enforcement equipment comprising:

a front wall having overlapping edges;

a center piece of rigid material attached to said front wall and for holding a shape of the holster;

a back wall attached to said front wall and the center piece of rigid material,

at least two rail straps affixed to said front wall; and,

a rail system that includes at least two adjustable straps, one strap being positioned above the other one and each strap passing through at least one rail strap for holding said holster in a desired position
